ANNE EN-TZU YANG

Minneapolis, MN, USA | anneyanget@gmail.com | +1 (617) 309-9419
aety.github.io | linkedin.com/in/aetyang | github.com/aety

SKILLS

- **Languages:** Python, SQL, HTML, JavaScript, Matlab, LaTeX
- **Packages:** Nginx, Gunicorn, Pandas, Matplotlib, Seaborn, Flask, Numpy, Scipy, scikit-learn, statsmodels, XGBoost, TensorFlow, NLTK, TextBlob, SQLAlchemy, psycopg2, BeautifulSoup, Prophet, azure-storage-blob
- **Tools:** Power BI, Git, Github, Anaconda, Jupyter Notebook, Spyder, Azure (PostgreSQL DB, VM, NSG, blob storage), MS SQL Management Studio, AWS (RDS, EC2, Route 53), Google Charts

EXPERIENCE

- **Senior Data Scientist**. 3M *(Maplewood, MN, USA)* *02/2020 - present*
  - Provided **continuous production insights** for digital orthodontics by **mining data** from treatment planning logs on *Azure Blob Storage*. Created **insightful metrics, dashboards, Power BI reports** to summarize success rate and error code to **influence the model development**.
  - Employed **ML and other statistical techniques** to reduce costs from undesirable treatment outcome and **advise the team on potential improvements**, based on mechanically informed features.
  - Facilitated workshops for **training and exploration of new technologies**. Compiled documentation of knowledge and resources to **onboard and mentor new colleagues**.
  - **Communicated regularly with team members and stakeholders**. Contributed to Covid-19 Task Force.
  - Applied *NLP custom classifier* to **prioritize response to customers**.
  - Constructed the **front-end** (*html, css, javascript*) and **back-end** (*flask, PostgreSQL*) of dashboards.
  - **Engineered data** by integrating *Python* and *C#* via *shell calls* to append to *Azure PostgreSQL Database*.
- **Data Science Fellow**. Insight Data Science *(Remote)* *09/2019 - 10/2019*
  - Deployed a **web app** recommending best air quality in Paris metro based on **time series forecasting**.
  - Utilized *Prophet* to predict hourly PM10 (pollutant) concentration, with an SMAPE error of 12%.
- **Postdoctoral Researcher**. Inst. for Intelligent Systems and Robotics *(Paris, France)* *09/2018 - 08/2019*
  - Trained **convolutional neural networks (CNN)** to reconstruct deformable 3D shape and orientation at $\sim$ 10 ms/frame (errors $<1^\circ$) with **medical images** (*DICOM*) acquired from an operating room.
  - Designed a system of markers to track 3D intraoperative surgical tools from individual 2D X-ray images.
- **PhD Intern**. Sanofi *(Bridgewater, NJ, USA)* *06/2017 - 08/2017*
  - Collaborated with immunologists to revise a **simulation of asthma** formation and treatment.
  - Automated statistical tests and visualized on 10k entries of **clinical trial** data in *Matlab*.
- **PhD Candidate**. Northwestern University *(Evanston, IL, USA)* *09/2012 - 08/2018*
  - Built a **rat whisker sensor** to measure forces at micro-scale, initiating a $1M multi-university grant.
  - Modeled rat whiskers as tapered beams in *Matlab* and *Python* to quantify whisker mechanics under contact or airflow. **Predicted neural signals** (R^2=0.93) from 420 sets of 100-ms data sampled at 10kHz.

EDUCATION

- **PhD in Mechanical Engineering**. Northwestern University *(Evanston, IL, USA)* *09/2012 - 08/2018*
- **Certificate of Management**. Kellogg School of Management *(Evanston, IL, USA)* *06/2016 - 08/2016*
- **BS in Mechanical Engineering**. National Taiwan University *(Taipei, Taiwan)* *09/2008 - 06/2012*
